

Fraser Valley Conservancy Proposed Harrison River Sensitive Ecosystems Inventory Study Area

The below map depicts a draft SEI study area (light blue line) encompassing the mouth of the Harrison River, Harrison Bay, Chehalis Wetlands, Harrison Knob, and the northern bank of the Fraser River at Harrison Mills. The study area is located about 100km east of Vancouver on the Fraser River directly north of the City of Chilliwack. The maps were adapted from Google maps. The boundaries will likely change when the project begins and partners are consulted.
