PRECIOUS
FROG
HELP RECOVER THE
OREGON SPOTTED FROG

Spring Break Employment Opportunities - Student Biologist for High School Students to study and monitor Oregon Spotted Frogs in the Eastern Fraser Valley of B.C.

Background

The Oregon Spotted Frog is B.C.'s most endangered amphibian, with fewer than 500 breeding females in the wild. These positions will support the Oregon Spotted Frog Recovery Team's efforts in monitoring populations and understanding extinction pressures faced by the species. Learn more at www.preciousfrog.ca.

Description of Work

The student biologists will work with experienced biologists to survey for, trap, tag, measure and record data about frogs in areas around Abbotsford, Chilliwack and Agassiz. This is a fantastic opportunity for Grade 11 and 12 students with a strong interest in wildlife, conservation, and biology.

Days will be long, often cold, and always wet and muddy. There will be some glorious sunny spring days in the wetlands, rainy days, and perhaps some snow. An optimistic attitude and good humor are crucial. If wet, slimy, and up to the shoulders in frogs sounds like fun to you, please join us! Waders will be provided.

Two positions are available.

Two student biologists will be hired by the Fraser Valley Conservancy, and paid \$12/h for 80 hours of work from **March 13 - 24, 2017**. Work is weather-dependent, so some weekend work is likely. Transportation to and from field sites will be provided from a rendezvous point in Abbotsford, Chilliwack or Agassiz.

If you think this sounds like a grand way to spend your spring break, send your resume by midnight on February 5, 2017 to aleesha@fraservalleyconservancy.ca
